DETAILED ACTION

Allowable Subject Matter

Claims 1-27 are allowed.

The following is an examiner's statement of reasons for allowance:

The subject matter of the present invention differs from the teachings of the prior art (specifically DE 19927365) in that the present invention comprises a control means that can electronically change the switching values of several pumps in the same sump pump so that they can be activated in an alternating fashion. None of the prior art teaches or suggests the use of a control means that can electronically change the switching values of several pumps in the same sump pump so that they can be activated in an alternating fashion. It cannot be considered obvious to a person skilled in the art, with knowledge of the references cited in Form 892, to use a control means that can electronically change the switching values of several pumps in the same sump pump so that they can be activated in an alternating fashion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
